

## KEY BENEFITS

- **Cost effective and time saving.** Expenses such as labour and time will be significantly reduced due to the quick and easy installation process of ESM-B® boxes.
- ESM-B® boxes are the **safest and foremost fire preventive outlet** enclosures, the entire enclosure always satisfies or exceeds the electrical industries flammability requirements.
- **Truly a weatherproof “Raintight” solution** that creates the perfect seal which prevents water from entering the enclosure which could initiate an electrical fire.
- Our products are **always in compliance with the strictest electrical code**, avoid using illegal enclosures and stop wasting time by switching to ESM-B®.
- These boxes feature a **grounded surface** on which the wiring device or light fixture is seated, making them the most incomparable electrical outlet box available in the industry.
- **Simple one piece installation** with absolutely nothing to disassemble or reassemble. Does away with all the extra labor and costs associated with basic outlet boxes.
- **ESM-B® outlet boxes are aesthetically pleasing and look exceptional with all forms of architecture from traditional to modern.** These boxes have a timeless and simple shape that never goes out of style.
- **Paintable.** The boxes can easily be painted in order to accommodate any customized colour you may require for your installation.
- ESM-B® products are manufactured with **UV-resistant plastic** which is tough and durable and can endure a lifetime of exposure to even the harshest environmental elements.
- Simple and **easy to remove during renovations** without causing damage to exterior finishes.
- **Provides a finished surface** to place fixtures or devices.
- **CSA International Approved.**

## PF MODEL

- **Product Code:** ESM-B PF
- **Description:** Weatherproof/Raintight Exterior Electrical Fixture Box
- **Listing:** CSA Ⓢ
- **Material:** UV-Rated Plastic
- **Features:** Fully Assembled, Weatherproof/Raintight, Paintable, UV Resistant, Ground Strip Included
- **Style:** Universal

## PD MODEL

- **Product Code:** ESM-B PD
- **Description:** Weatherproof/Raintight Exterior Electrical Receptacle Box
- **Listing:** CSA Ⓢ
- **Material:** UV-Rated Plastic
- **Features:** Fully Assembled, Weatherproof/Raintight, Horizontal or Vertical, Paintable, UV Resistant, Ground Strip Included
- **Style:** Universal

## WHY USE ESM-B® BOXES?

Over the years ESM-B® products, also known as “Stumm Boxes” have become the gold standard for exterior electrical outlet and fixture installations and renovations across North America. These original and one of a kind boxes have been installed on hundreds of thousands of structures of all types ranging from award winning single-family homes to many large multi-family and commercial developments. ESM-B® boxes are safe, highly cost effective and incredible time savers. Industry leading electricians have chosen to incorporate our “Raintight” boxes into their trade for many clear reasons:

- *Up to 70% cost savings*
- *2-3 times faster installation*
- *100% safe weatherproof/raintight enclosure*
- *Highest quality finish*
- *Universal design appeal*

## SIDING APPLICATIONS:

The ESM-B® “Stumm Box” is the indisputable choice and a highly innovative product to utilize on all siding applications for a wide variety of reasons:

- Many siding installers create their own mounting blocks or install extension covers / retail mounting blocks on the siding to mount fixtures, plugs, etc. This can create many problems due to **these siding products not always being electrically rated which usually results in a sub-par installation or worse could result in an illegal enclosure.**
- Siding covers and mounting block installations are more costly in terms of labour and material expenses compared to the simple one step solution of ESM-B® products.
- ESM-B® products compliment the visual appearance of the property by providing a seamless and professional finish.

## MASONRY APPLICATIONS:

ESM-B® boxes are hands down the obvious choice for Masonry applications, such as rough or uneven stone work etc. When “Stumm Boxes” are used water cannot enter into the electrical outlet enclosure, therefore preventing electrical fires. **Our products greatly simplify the installation process for any masonry application with their one step solution.** ESM-B® boxes create a fine and distinguished finish on all Masonry applications.

## OTHER APPLICATIONS:

Stumm Boxes can further be used to create a 100% safe enclosure on virtually any other type of structural finish such as concrete, tile, wood and more.

## STUCCO APPLICATIONS:

When used on Stucco ESM-B® “Stumm Boxes” create a 100% safe weatherproof/raintight receptacle that is never embedded. If they ever need to be removed, the stucco will not be damaged if the box is removed using caution. Due to basic electrical boxes being embedded in the stucco, if the box is ever required to be removed, significant damage can occur to the stucco. ESM-B® boxes however are unquestionably effortless to remove post-installation, which makes them optimal for renovations.
